

SYED MOHAMMED TABREEZ REHAN

CYBER SECURITY · AI & PROMPT ENG · WEB DEVELOPER · BUSINESS ANALYST · PRODUCT & PM

Hyderabad · Bangalore · Chennai, India (Open to Remote / Relocation) | +91 9347638395 | syedrehan0428@gmail.com |

www.linkedin.com/in/syed-rehan-85b25a377

Candidate Philosophy: "I don't want to simply be a candidate who knows technologies — I want to be the candidate who understands the problem, builds the solution, and creates business value."

Career Objective: Third-year Cyber Security undergraduate seeking internship and full-time opportunities in **Cyber Security, AI & Prompt Engineering, Web Development, Business Analysis, or Product & Project Management** where I can combine technical rigor, business understanding, and defensive engineering to build scalable, high-impact systems.

EDUCATION

Vel Tech Rangarajan Dr. Sagunthala R&D Institute of Science and Technology

Chennai, Tamil Nadu

Bachelor of Technology (B.Tech) in **Cyber Security** (3rd Year) | **CGPA: 8.5 / 10**

Expected Graduation: **2028**

TECHNICAL & BUSINESS COMPETENCIES

Cyber Security:	OWASP Top 10 Mitigation, Web & Network Security, Vulnerability Assessment, Threat Modeling, Prompt Delimiter Sandboxing, Auth (JWT, OAuth 2.0, RBAC), Secure Coding
AI & Prompt Eng:	LLM API Integration, Retrieval-Augmented Generation (RAG), Stateful Conversational UX, Multi-turn Heuristics, Schema Enforcement, NLP
Business & PM:	Business Analysis, Requirements Gathering (BRD/PRD), User Stories, Agile/Scrum, Product Roadmaps, Stakeholder Management, Process Mapping, Wireframing
Web & Backend:	React.js, Node.js, Express.js, RESTful API Design, Micro-components, Modern Responsive Web Architecture
Programming:	JavaScript (ES6+), TypeScript, Java, HTML5, CSS3 / Tailwind CSS
Databases & Tools:	MySQL, MongoDB, Firebase, Git & GitHub, VS Code, Figma, JIRA/Trello, Linux Terminal

VERIFIED CREDENTIALS & CERTIFICATIONS

• NPTEL Elite Gold (90% Score) — Human-Computer Interaction (HCI) Funded by MoE, Govt. of India · IIT Madras & IIT Delhi. Top 1% nationally out of 23,139 candidates.	2026
• Oracle Cloud Infrastructure Certified Agentic AI Foundations Associate (2025) Oracle University · Agentic AI architectures, LLM tool-calling pipelines, and autonomous workflows. (Cert ID: 103549193AAI26OFA)	2025
• Reliance Foundation Skilling Academy — Cyber Security Associate Programme Defensive cybersecurity skilling course. (Cert ID: RFSA000625636)	2026
• IBM SkillsBuild — Getting Started with Artificial Intelligence Artificial intelligence fundamentals, neural networks, machine learning principles, and ethical AI deployment.	2025
• NASSCOM & Skill India — Analyst Endpoint Security & AI Business Analyst Authorized by Chairperson NASSCOM. Defensive endpoint monitoring, threat mitigation, and business analytics.	2025
• Brainovision & AICTE — AI for Generation & Automation (1-Month Internship) Internship certificate recognized by AICTE. Stateful generative AI workflows and automated API pipelines.	2026

SELECTED SHIPPED PROJECTS

AI Travel Chatbot — Conversational Itinerary Planner OpenAI LLM API, Prompt Engineering, FastAPI, React	2025
• Built an intelligent conversational assistant that models itineraries as stateful JSON, allowing users to modify travel plans conversationally turn-by-turn.	
• Engineered a clarify-vs-commit prompt heuristic that reduced back-and-forth conversational turns by ~40% while preserving context integrity.	
• Enforced structured schema outputs ensuring zero hallucinations for critical reservation parameters, budget tiers, and timing.	
AI Farmer Chatbot — Multilingual Agricultural Advisory NLP, Multilingual Prompt Engineering, REST API, React	2025
• Developed a voice/text agricultural advisory platform supporting 4 Indian languages (English, Hindi, Telugu, Urdu) for crop, weather, and fertilizer triage.	
• Optimized response payloads for low-bandwidth rural connectivity, delivering 1-line immediate advisories paired with a 3-line scientific rationale.	
• Built language auto-detection and regional crop calendars to assist tier-2/tier-3 farming communities with zero operational overhead.	

SELECTED SHIPPED PROJECTS (CONTINUED)

Dynamic Credit Risk Monitoring Engine <i>Machine Learning, scikit-learn, Pandas, FastAPI, MongoDB, React</i>	2025
- Engineered an ML-driven predictive credit evaluation engine that evaluates rolling repayment velocity rather than static retrospective credit scores. - Implemented explainable alert generation surfacing borrower risk factors up to weeks before loan default milestones. - Built an interactive real-time parameter sandbox allowing credit officers to evaluate transaction category drift and volatility impact.	
AI Career Advisor & Mentorship Platform <i>React.js, Node.js, Express.js, LLM API, Prompt Engineering</i>	2025
- Designed a personalized career guidance platform recommending step-by-step roadmaps, verified certifications, and learning milestones. - Constrained LLM outputs into ranked 3-step actionable roadmaps with verifiable milestones, avoiding generic conversational advice.	
AI Disaster Response System <i>AI Triage, NLP, GIS Emergency Concepts, Multilingual Comms</i>	2025
- Created an emergency triage pipeline classifying urgent crisis requests (medical, food, rescue) with sub-2s response latency. - Implemented deduplication and geo-clustering algorithms to match emergency reports with nearest emergency response teams.	

CORE VALUE ARCHITECTURE & WHAT I BRING

AI + Cybersecurity Mindset: Combining intelligent automation, risk management, and security-focused problem solving to address real-world business challenges.	Risk & Security Awareness: Applying cybersecurity principles to identify threats, strengthen systems, protect data, and support business continuity.
Business-Driven Problem Solving: Identifying business needs, analyzing problems, and translating them into practical technology solutions that create measurable value.	Product & Solution Thinking: Understanding user requirements, defining practical solutions, prioritizing features, and focusing on usability, scalability, and business impact.
Web & AI Development: Building scalable solutions across frontend, backend, databases, APIs, AI/ML integrations, and cloud-ready technologies.	Hackathon & Innovation: Developing and presenting technology solutions under time constraints while working with teams to turn ideas into functional prototypes.
Data-Driven Decision Making: Using data, analytics, and AI to identify patterns, improve processes, support informed decisions, and reduce operational risks.	Stakeholder & Communication: Capable of communicating technical concepts clearly, collaborating with teams, understanding requirements, and presenting solutions effectively.
Process Improvement & Automation: Exploring opportunities to automate repetitive workflows, improve efficiency, reduce manual effort, and enhance user experience.	Continuous Learner: Continuously developing expertise across AI/ML, cybersecurity, software engineering, business analysis, and emerging technologies.

LANGUAGES & LOGISTICS

Languages:	English (Full Professional), Hindi (Fluent), Telugu (Conversational), Urdu (Native Proficiency)
Availability:	Open for Summer 2026 Internships and Full-Time Roles Location Preference: Hyderabad, Bangalore, Chennai (Open to Remote / Relocation)
Portfolio & Lab:	syedrehan.in (Live interactive AI simulators, terminal CLI & verified certificate credentials viewer)
